Elysium7 Ltd re-located to Dunston Business Village at the start of the year.

We were most impressed with the vision and attention to detail that has gone into the Dunston Business Village project. The process of putting together the contract was professional but friendly, and all very efficiently executed.

Having moved in, any query/issue was dealt with extremely professionally. Certainly, the ability to deal with the people who get things done is a major advantage. The I.T. / phone services are a particular strength, at a time when communications need to be quick and reliable.

The location makes it perfect for visitors to our office, whether travelling from the north or south.

We would not hesitate to recommend Dunston Business Village to any prospective tenant seeking a good working environment and looking to give their business a professional profile.

Terry Selman
